An Intro to Koa and Zones

Beyond Express: error handling with ECMAScript 6 generators

koa

next generation web framework for node.js

In this post, Jed Wood explains what Koa is and just how easy it is to try both locally and on Heroku. Also, presented in this post is a preview of "Zones", a project led by Node core contributor Bert Belder that looks to create a better way to manage asynchronous control flow in Node. Is Node affected by the Heartbleed bug?

What you need to know about Heartbleed and your Node apps

By now you've read all about the Heartbleed bug and the potential threat it poses to the users of websites and applications that make use of OpenSSL. What about websites and applications built with Node? Are Node apps affected by the Heartbleed bug? In this post, Bert Belder offers his advice. [Read the blog >>](#)
