

MAY 2018 NEWSLETTER

IBM Bay Area Integration Developers Meetup

When: May 30th, 2018 @ 6PM - 9PM

Where: Galvanize
44 Tehama St, San Francisco, CA

Agenda:

- **Dennis Ashby**- Learn how to quickly build **APIs** using **Node.js** to leverage **Watson Visual Recognition** to create a unique **Mobile App** experience.
- **TBD**- Introduce and explore a developer focused tool, **MicroClimate**, that provides **cloud based rapid inner loop development** and DevOps integration.

Meetup: Building an AI Recognition App with Node.js and Watson Visual Recognition

We're excited to announce a new meetup! IBM is working alongside MobileMonday to present new events, starting in May. First up, "Building an AI Recognition App with Node.js and Watson Visual Recognition".

Dennis Ashby, Director of IBM's Developer Advocacy Team in the IBM Cloud Integration Business, will teach how to build Apps that combine Node.js and Watson Visual Recognition, Swift, and Google's Geo-Location APIs. He'll also share some best practices and techniques.

Video: Using LoopBack to Connect, Create

and More at Wordnik

Watch this video from March's JS.LA to learn how to connect LoopBack to your datasource, how to create a model, how to add a custom method and more! Erin McKean gives you the info.

Announcing LoopBack 4 Developer Preview 2

Since the release of Developer Preview #1 in November 2017, the LoopBack team have been focusing on adding features for application developers to define and implement REST APIs with Controllers and Repositories. We also continue to improve the core modules of the framework, such as Decorator/Metadata and Context/Dependency Injection. A lot of efforts are put into documentation and developer productivity. We're pleased to announce that Developer Preview #2 of LoopBack 4 is now available!
