Announcing LoopBack 3.0 Release Candidate

In late October we announced availability of LoopBack 3.0, a Release Candidate version. While we don't recommend this version for production use, we are encouraging all LoopBack users to give it a try and let us know about any issue that needs to be fixed before the GA release.

We are planning to release 3.0 GA by the end of November 2016, assuming everything goes well. Click the button below for more details about the Release Candidate version.

Infographic: Developers Trust Node.js When Building Their APIs

Developers and the enterprise are gravitating towards Node because of its proven performance, its ability to retain and leverage the skills of JavaScript developers and the ability to deliver projects faster than other languages can. Our new infographic captures some of the data around the adoption of Node.

IBM API Connect

Video: IBM API Connect puts the focus back on innovative app development

App developers want to focus on building great apps, which means the less time they spend managing APIs the better. This video shows how IBM API Connect simplifies API creation, integration, consumption and management. With it, development cycles are slashed from weeks to hours – and developers get back to doing what they do best.
