

Studio Beta R2 is Out!

Migrate and discover models plus
DevOps features like CPU profiling and Heap snapshots

Read the [Studio Beta R2 announcement blog](#) to get all the details.

New in this release of StrongLoop Studio:

- **Migrate models to a datasource**
- **Discover models**
- **CPU profiling**
- **Heap snapshots**

The previous release included the ability to:

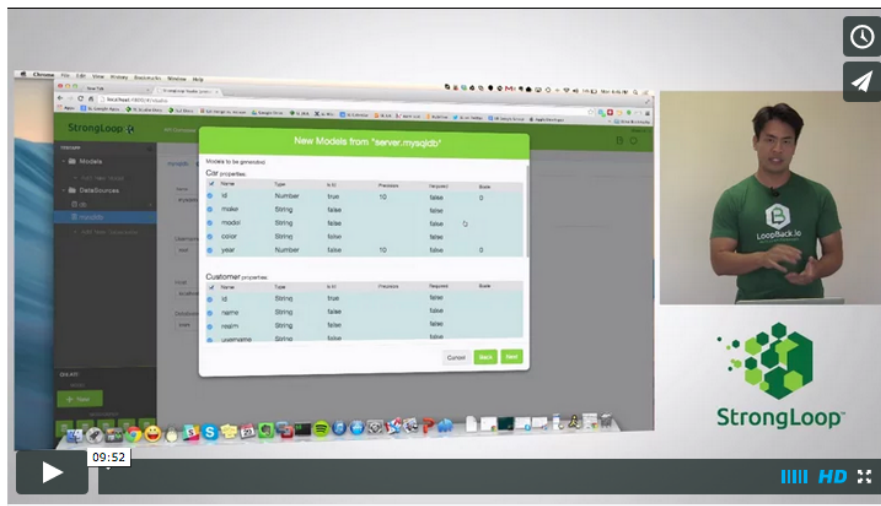

- **Create, edit and delete models**

- Create, edit and delete datasources
- Attach models to a datasource
- Migrate models from one datasource to another

Sign Up and try Studio!

What's StrongLoop Studio?

It's a graphical UI for developing APIs in Node.js using the open source **Loopback API** framework. LoopBack supports a variety of databases including MongoDB, MySQL, Oracle, SQL Server and PostgreSQL. It also comes enabled with mobile-ready services like offline sync, push and geopoint. It also provides a UI for DevOps functions like CPU profiling and Heap snapshots. More features on the way!

Watch this short video with CTO AI Tsang to get a walkthrough of the new features in this release of Studio.

Node Fundamentals and API Development Training

Sign up for two days of hands-on training for \$250

We're excited to announce that we partnered up with Vizuri, BestBuy, Applause and Galvanize to bring two days Node fundamentals and API development training to a city near you! Join us for both days or just one, depending on your skill level.

- Nov 6-7: **Denver, CO** at Galvanize Campus
- Nov 13-14: **Herndon, VA** at Vizuri
- Dec 3-4: **Framingham, MA** at Applause
- Dec 11-12: **Minneapolis, MN** at BestBuy

Early bird pricing of \$250 for two days of Node training ends soon! Class sizes are limited so reserve your seat today!
