Welcome to the May StrongLoop newsletter, a summary of the previous month's StrongLoop blog content: LoopBack, API Microgateway, the Open API Initiative, and API developer news and tutorials, as well as announcements and events.

Build an Online Game With LoopBack 4 (Pt 3)

Wenbo Sun has been sharing a new project he’s creating: an online web text-based adventure game. We already have some simple APIs in this project. They are all default CRUD (Create, Read, Update, and Delete) APIs that auto-generated by LoopBack 4. In the latest part of this series by Wenbo Sun, discover how to customize APIs in Controller!

Learn About Mashr and Puppeteer at the Next HackerJS Meetup (June 12)

The next HackerJS Meetup will feature two great talks, as well as open mic and social time:

- “Building a Data Pipeline for the Cloud” - Jacob Coker-Dukowitz, Software Engineer at Mashr.

- “e2e UI testing using Puppeteer” - Amir Jafarian, Software Engineer for API Connect at IBM.

Learn more about these and register at the link!

LoopBack 4 April 2019 Milestone Update

Janny Hou describes an outstanding number of code contributions in March, making for a very productive month! We merged 63 PRs in total, and 10 out of them are from the community. Cheers!

The team was able to make good progress of the epics we are focusing on, like LB3 to LB4 migration, adding @loopback/context features, JavaScript experience, the authentication system, and describing model properties to be more flexible. Read more to see the details of our achievements in March.

Other News

We have a couple of important announcements for two events that may be of interest to you!

- Node + JS Interactive 2019 CFP Now Open >>>
- Introducing ASC, the API Specifications Conference >>>

That’s all for this month! Thanks for reading, and we’ll see you when we wrap up June.
